2. Comments:

- Amazing at teaching and explaining course materials! Only major downside is that he would never reply to emails. It would often take up to a week or more in order to receive an email back. One time I had an important question regarding a problem that I thought would be on the midterm exam... he never responded and the question was in fact on the midterm and I got the question wrong. His job includes reading emails.... READ THEM! It is helpful for us students.

- Best TA and very patient and helpful.

- Great TA who really knew the material! Not much else to say, truly appreciated the help! It was just difficult making it to an 8 am math discussion on Thursday....

- He is a very good TA but his grading scheme and format could be adjusted to better help students. I am very grateful that I had Kevin as my TA for this course, as he seemed to be the most knowledgeable and most helpful one. He is a very good teacher, and genuinely cared about organizing his discussion around his students' needs. I appreciated how he went over midterm problems in detail after we got them back, and how he assisted us with homework problems we had trouble on. In addition, the review session that he solely led before the second midterm was extremely helpful. He is very good at explaining complicated math problems in simple terms his students could understand.

- Kevin is a great TA. He is nice, helpful, approachable, and knowledgeable about the material.

- Kevin is always looking for ways to help us, and is explains math in a way that everyone can understand. I genuinely appreciate having his as a TA.

- Kevin is an amazing guy. He is VERY helpful and friendly. He made discussion section very resourceful. He always found a way to break down the material, provide relevant/helpful examples, and his explanations were always easy to understand. He has a charisma that makes everyone in the classroom feel welcomed and secure to ask questions. He was always available to help students and...
